Allermyl® medicated shampoo for atopic, allergic, sensitive or itchy skin in cats and dogs. Available in a 200 mL bottle.

PROPERTIES
- Soothes, cleanses and moisturises.
- Foaming microemulsion helps distribute the shampoo throughout the skin.
- Relieves itching and irritation.
- Dye and fragrance free.
- Maintains skin barrier integrity and microbial balance.
- Physiological pH.
- Cleans, soothes and moisturises irritated skin.
- Recommended by the international committee on allergic diseases of animals.

COMPOSITION
- Gentle cleansing agents.
- Skin Lipid Complex™ (Ceramide 3, Ceramide 6 II, Ceramide 1).
- Glycotechnology™ (rhamnose, galactose, mannose, lauryl glucoside).
- Defensin Technology™ (Peumus boldus leaf extract, Spiraea ulmaria extract).
- Piroctone olamine.
- Essential Fatty Acids (linoleic acid, linolenic acid).

INDICATIONS
For use in dogs and cats for the treatment and management of allergic and atopic skin diseases.

MODE OF ACTION
The deeply moisturising Skin-Lipid-Complex™ improves skin barrier function to help protect against allergens such as pollen and pathogens such as bacteria and yeast. Skin-Innovative-Science™, which incorporates Defensin™ Technology and Glycotechnology™, upregulates the body’s own defences against infection and reduces the ability of pathogenic organisms to attach to the skin.

CAUTIONS
- For animal use only.
- For topical use only.
- Avoid contact with eyes.
- If the shampoo gets in your pet’s eyes rinse well with clean water.
- Wash your hands after use.

DIRECTIONS FOR USE
- Shake well before use.
- Due to the fluid nature of the product, it is not recommended to pour Allermyl® into your hand before applying to the coat.
- Wet the hair coat with warm water, invert bottle and apply a thin line of shampoo from the base of the neck to the base of the tail.
- Massage Allermyl® shampoo into the wet hair coat, lather well.
- Rinse, repeat and then allow lather to remain on the hair coat for 5 to 10 minutes.
- Rinse thoroughly with clean, warm water.
- Repeat 2 or 3 times per week for 2 weeks, then as directed by your veterinarian.

PRESENTATION
200 mL bottle.

STORAGE
Store below 30°C (room temperature). Keep out of the reach of children.
A. AS A CLEANSING SHAMPOO AS AN AID FOR THE MANAGEMENT OF ALLERGIC SKIN CONDITIONS IN DOGS, CATS AND HORSES.

**RECOMMENDATIONS**

- Recommended by the International Task Force on Canine Atopic Dermatitis.
- Treatment of acute flares of CAD: improvement of skin and coat hygiene and care.

**SUPPORTED BY PUBLISHED STUDIES:**

1. The efficacy of a commercial shampoo and whirlpooling in the treatment of canine pruritus – a double-blinded, randomised, placebo-controlled study.
   **FINDING:** A weekly bath with a 10 minute application of Allermyl® led to a halving of pruritus scores within 24 hours in 25% of treated dogs.

2. Antiallergic shampoo and oral essential fatty acid combination therapy to relieve signs of atopic dermatitis in dogs: a blinded prednisolone-controlled trial.
   **FINDING:** Allermyl® reduces clinical signs and pruritus. Allermyl® decreases the number of specific treatments without the side effects related to prednisolone use.

B. AS AN AID FOR THE MANAGEMENT OF ALLERGIC SKIN CONDITIONS IN DOGS AND CATS.

**IN PARTICULAR:**

- Acute flares of Canine Atopic Dermatitis.
- Maintenance phase of CAD (asymptomatic).

---

**Allermyl® shampoo**

Virbac is a pioneer in veterinary dermatology and offers a range of comprehensive skin products to treat a wide range of dermatological disorders. These are designed to improve the quality of life for both pets and their owners.

Allermyl® is specifically designed to meet the needs of dogs and cats with skin barrier imbalance. It is a neutral pH unfragranced shampoo, used to help soothe irritated skin. Allermyl® is a unique foaming micro-emulsion which combines ingredients that help to maintain skin barrier integrity and natural microbial balance.

- **Improved skin barrier protection against environmental irritants with Skin-Lipid-Complex™ (S-L-C™).**
- **Improved skin vitality with S-I-S™ (Skin-Innovative -Science) technology.**

Allermyl® is used for the topical management of allergic skin conditions. It relieves irritation and itching, has a beneficial effect on damaged skin, and cleanses the epidermis. It is recommended to help restore skin damaged by allergic reactions in dogs and cats.

Allermyl® helps to reinforce cutaneous integrity and aids in controlling microbial proliferation. It contains a soothing combination of natural anti-inflammatory ingredients, mild cleansing agents, and essential fatty acids.

The foaming micro-emulsion in Allermyl® helps the ingredients penetrate the skin for deep, soothing relief. It contains NEW Defensin Technology™ which works alongside Virbac’s existing state-of-the-art Glycotechnology™. Anti-adhesive Glycotechnology™ with monosaccharides and an alkyl-polyglucoside which reduces bacterial and yeast adhesion to the outer most layer of the skin. This process prevents bacteria build-up on the skin surface which may also delay skin irritation.

Allermyl® also contains Skin-Lipid-Complex™ which helps to reinforce cutaneous integrity and helps to maintain epidermal barrier function. Active ingredients include linoleic acid and gamma linolenic acid (omega 6), which are essential fatty acids that help to repair the skin, and p’iroctone olamine, a compound with anti-fungal properties.
