

Shaping the future
of animal health

14 January 2019

To whom it may concern

I can verify that Lepto 2-way (ACVM No. A9166) and Lepto 3-way (ACVM No. A8314), leptospirosis vaccine for cattle, does not contain any Genetically Modified Organisms (GMOs). Moreover, the vaccines are not genetically engineered and do not contain any genetically engineered (GE) components.

Kind regards
