

# AQUADENT FR3SH

## DENTAL SOLUTION FOR DRINKING WATER

### DESCRIPTION

Aquadent® FR3SH is a water additive which allows for an easier, and more convenient way to fight bad breath and maintain teeth.

### ACTIVE INGREDIENTS

FR3SH™ Technology composing of:

- Erythritol
- Inulin
- Pomegranate

### KEY BENEFITS/PROPERTIES

- Proven with science - Safety study, palatability study, and efficacy study
- Easy to administer
- No artificial aroma, no xylitol, no chlorhexidine, no paraben
- Erythritol for a better freshening effect (and safer) than xylitol
- Safe for use in cats and dogs

### MODE OF ACTION

- Pomegranate extract, a natural antioxidant, prevents accumulation of plaque forming bacteria.
- Erythritol freshens breath with cooling action and limits biofilm formation.
- Bad breath can result from gastrointestinal problems due to unbalanced intestinal microflora. Inulin, a prebiotic promotes a balanced and healthy gut flora.

### INDICATIONS

Recommended to help maintain healthy, fresh breath and to support healthy teeth and gums.

### CONTRAINDICATIONS

No known contraindications.

### DOSAGE / ADMINISTRATION

Shake before using. Light sedimentation is normal. Aquadent® FR3SH™ should be added daily to fresh drinking water. Recommended quantities should be measured using the dosing cup. Provide additional water as needed. Discard any water not consumed within 24 hours. Prepare new Aquadent® FR3SH™ dental solution each day.

**Cat:** 2.5mL Aquadent® FR3SH™ for every 250mL of water  
**Dog <10kg:** 5mL Aquadent® FR3SH™ for every 500mL of water

**Dog 10-25kg:** 10mL Aquadent® FR3SH™ for every 1000mL of water

**Dog >25kg:** 15mL Aquadent® FR3SH™ for every 1500mL

### STORAGE

Store at room temperature, away from heat and direct spotlight.

### PRESENTATION

250ml bottle.
