

# STRATEGY-T®

## BROAD-SPECTRUM WORMER FOR HORSES

A broad-spectrum horse wormer that is specifically designed to treat worms that are resistant to ML's ('mectins') and BZ's ('benzimidazoles'), the most commonly used ingredients in horse wormers.

### ACTIVE INGREDIENTS

- Oxfendazole
- Pyrantel

### KEY BENEFITS/PROPERTIES

- Large volume: can treat horses up to 700 kg
- Strategic therapy: essential part of treatment protocol
- Delicious flavour: easy to administer
- Safe to use on all horses including pregnant mares and breeding stallions
- Best time to use: Spring and Summer

### MODE OF ACTION

Oxfendazole is a broad spectrum benzimidazole (BZ) wormer, it is effective against roundworms, strongyles and pinworms.

Pyrantel is a broad-spectrum wormer, it is effective against roundworms, strongyles, pinworms and tapeworms.

This combination therapy leads to higher effectiveness.

### DOSAGE / ADMINISTRATION

Dose at 1mL per 20 kg body weight. Each weight marking on the plunger will deliver 5ml of paste, which is sufficient to treat 100kg of body weight.

Dose Strategy-T® to every foal, at 2 months of age, and at 5 months of age.

### RECOMMENDED FOR

- Foals are particularly prone to Parascaris: large roundworms.
- Parascaris is particularly resistant to mectins: the active ingredients in most horse wormers.
- Strategy-T® is an essential treatment for foals.

### PRECAUTIONS

Ensure locking ring is securely locked in place at the correct dose.

### WITHHOLDING PERIOD

Meat: 63 days.

### STORAGE

Store at room temperature.

### PRESENTATION

35ml dial-a-dose tube.

Strategy-T® is a registered pursuant to the ACVM Act 1997. ACVM No. A010923.
